

## Ag Rescue Operations - 1Day course (8 hrs)

### Course Description:

The Ag rescue course is designed to be a one day weekend class to assist individual rescuers in honing their skills in the unique arena of the modern farm. This course will be intense, fast paced and hands on with only a short time spent in the classroom and the bulk of the day in skills rotations. The student needs only to arrive with a attitude of learning, no previous training or certification is required. This course will offer new concepts and skills to the new rescuer and the seasoned professional.

### Prerequisites:

Students must bring proper PPE to include; steel toed boots, hard hat, gloves, kneepads and safety glasses. Dress is weather dependent. Class will be held in any weather, provided it is safe so please bring rain gear as needed.

### Main Topics Covered:

- Farm accident case studies
- OSHA compliance
- Grain Bin entrapment
- Entanglement
- Tractor Rollover entrapment
- Ag Haz Mat
- New Technology
- Specific EMS

### Course Options:

While designed for a one day class for convenience, this can be expanded to a two day class and customized to meet the needs of your department and your specific response needs.
